# 4.0 <u>Resources Available</u>

4.1 External Grants and Contributions can provide additional resources to the Capital Programme. Grant funding is subject to a detailed bidding process. Officers continue to liaise with external parties to secure the maximum available inward investment in order to contribute towards the delivery of the capital programme.

4.2 The most significant grants currently forecast over the medium term are from the Towns Fund, Shared and Rural Prosperity Fund's, Decarbonisation Wave 2.1 and the Better Care Fund (BCF) for Disabled Facilities Grants (DFG's). In addition to this, grants held from previous years for specific purposes are due to be utilised. For example, the Towns Fund projects, where grant instalments were received during 2022/23 and 2023/24, which is forecast to be utilised over the next financial year.

### 4.3 Capital Receipts

- 4.4 The general fund capital estimated receipts of £5.826m are made up of the sale of the residential properties on Stodman Street and the 50% staged payment for land at Lowfield Lane, due to be sold to Arkwood Developments.
- 4.5 The HRA capital receipts and 1-4-1 figures above relate to forecast Right to Buy (RTB) sales. The 1-4-1's are restricted for replacement homes and must be used as follows:
  - Amount to no more than 40% of the new build scheme cost
  - Spent within 5 years of receipt, or returned to Government with interest

Officers continue to monitor the deadlines closely and maximising use where practicable within the new build programme in order to avoid having to pay the remaining balances to Government with interest.

4.6 Where appropriate, the use of existing capital resources is prioritised. Borrowing is utilised for assets with longer asset lives, where the impact of interest and Minimum Revenue Provision (MRP) can be spread over the useful economic life of the asset, whilst minimising the impact on the General Fund. Leasing is also tightly controlled within the revenue budgets for the same reason and is rarely used as the interest rates remain low, therefore borrowing is currently a more attractive means of financing capital expenditure.

Subject to the approval of the proposals outlined in section 2.0 and 3.0 above, the current plan for financing the capital programme is shown below.
