OFFICIAL

Hi folks,

I have reviewed the application. There is no history of any previous noise complaints. There are other similar premises in the vicinity with licence conditions like those being applied for. Noise-related Annex 2 conditions attached to those licences are limited. In line with those reference points, I suggest conditions that for this application that:

1. restricts live and recorded music to indoors only, and
2. requires regular checks are made to monitor noise levels in the vicinity when live or recorded music is being played to ensure that no nuisance is caused.

If you require any clarification, please let us know.

Kind regards.

OFFICIAL

Good afternoon,

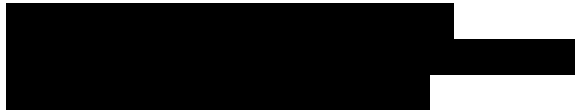

I'm just making sure that EP are aware of the Locke & Key variation application, extending the hours of RE until 01:00 at <https://www.newark-sherwooddc.gov.uk/premiselicense/>

We've received a representation from a resident, and I wanted to make sure EH have a view on this application as the applicant have offered very little in the way of any conditions that might foreseeably prevent Public Nuisance.

I can't see the email from Licensing highlighting the consultation on this application and wanted to make sure this was considered before the end of the week, as the consultation period ends 9 May.

Kind regards
